Laser Hair Removal

Where did you get it done and why?

I went to Therapie Beauty Clinic, on recommendation from a friend on both the therapists and the quality of their machine (condella)

I got the full body- legs, bikini and underarm. I used to wax bikini every 6 weeks. (braxilian wax €60) and shave my underarms and legs everytime I was in the shower. (sometimes waxed but due to my work schedule modelling could never let my hair grow!) Shaving was fine except it resulted in stubble, and a constant shadow underarm, which was annoying and a constant hassle.

As a model, it was something I have to constantly ensure I am as groomed as possible and completely hair free, so it was something I was always aware of and laser hair removal was a treatment I'd always wanted to get done.

Advantages of Laser Hair removal?

I never have to think about my hair on my legs, bikini or underarm. It's AMAZING! No shadows, no stubble. Working as a model, I may have to do a swimwear shoot at any time and I can be confident in wearing a bikini at any time and not have to worry about last minute waxing/shaving etc... Its also saved me so much time and maintenance (including money!) in the long run.

Disadvantages of Laser Hair removal?

I really recommend Laser hair removal and after having it done cannot think of any disadvantages. However, prior to having it done, the cost was a factor in not having the treatment earlier. It is a chunk of money to invest! In hindsight, it is well worth it, and also cost effective... when I think I was spending average €720 per year on bikini waxing alone! so waxing is more expensive per year- but laser has long term results...

Cost of treatment?

Cant remember exactly- I paid around €1000! I had checked around prices as well, and with the 70% off sale, Therapie were the best price by a long shot...

Length of Treatment per session & course?

Each treatment was 20 minutes long, I got 6 sessions. After the first treatment, there was a huge reduction in hair growth- I knew immediately I had made the right choice!

Service in Therapie and overall experience with therapist and staff?

Would you recommend other ladies to visit and why?

The Therapie therapists made me so comfortable, secure, and made the treatment as painless

as possible. It is about as uncomfortable as waxing, so to have a therapist who can keep you chatting and not focusing on the treatment is a pleasure.

I personally would recommend a clinic as well recognised as Therapie, whereby they have a great reputation and I was confident that they knew what they were doing. (They explained everything so professionally, did a patch test etc)

I did loads of research (went to 3-4 clinics before deciding and asked around friends etc). The condella machine got voted the worlds number 1 machine in the market and seems to give the best results. This machine is used in Therapie and after the first session, there was a huge reduction in hair growth and also I was delighted with the professionalism, helpfulness and the friendliness of the therapists.
